Granite City, IL 62040

Dear Ms. Bailey:

The U.S. Environmental Protection Agency (EPA) has completed the cleanup of the lead contamination at the property located at 2046-52 State Street in connection with the NL Industries/Taracorp site in Granite City, Illinois (the NL site). By way of this letter, U.S. EPA is certifying that this property has been cleaned up to less than 500 parts per million lead, the level which U.S. EPA considers protective of human health at the NL site.

Thank you for your cooperation in this cleanup effort. If you have any questions concerning this letter or need further information, please contact me at (312) 886-4742 or toll-free at 1-800-621-8431.

Sincerely,

Brad Bradley
Remedial Project Manager
